Dear Dan:

Thank you for the help you have provided to my patients. As a doctor specializing in nutritional programs, it is very important to me that my patients are empowered to follow their programs, so that they can succeed.

Recently, a young woman with interstitial cystitis, as well as severe gut dysbiosis, came to me for help. Her first statement to me was that she "couldn't take pills," which severely limited my ability to assist her. After a few sessions with you, she is following her program and progressing very well.

In another instance, my long-time patient with Type II diabetes had issues with feeding herself properly. She found your work life altering.

Thank you again, as we work together to assist our clients to achieve good health.

Very truly yours,
